Understanding the Menus

The Dictionary lets you translate words from English to Chinese and from Chinese to English. You can view and hear conversational phrases, access the User List and Exam List, or display nouns to improve your vocabulary.

The Databank lets you keep track of your contacts and schedule, using the following functions: Phone Book (TeleCard), Memo, Schedule, To Do List, Solar Anniversaries, and Lunar Anniversaries. The phone book also allows you to categorize your contacts into separate lists.

The Clock & Calendar lets you keep track of different times and dates by using a monthly calendar, local and world time, solar-lunar conversion, alarms, and a timer.

The Calculator & Converter lets you use a standard and scientific calculator, set the calculator between base 2 and base 10, and display units of measurement and conversion standards. You can also convert values and store financial information, such as the terms of a loan.

The Miscellaneous menu lets you exchange information and synchronize data with another Chinese-English Dictionary or with a PC running Chinese Windows. You can also read reference information, change the unit settings, set a password, and play games.
