Introduction

The *Tradeline*[®] *Pocket Stock Guide* is a powerful financial reference covering almost 6,000 NYSE, American, and NASDAQ stocks. It also covers more than 120 leading market indices.

For each stock or market index, you can see:

- a “Stock Snapshot” of earnings per share, price/earnings ratio, and other fundamental data;
- a second Stock Snapshot of 52 Week high and low prices, 1 and 5 percent price changes, and other pricing-related data;
- a 52 Week Price Chart of closing prices, and;
- a Market Comparison Chart versus the Standard & Poor’s 500 Index.

In addition, by using EZ Screening[™] you can screen stocks by up to 15 investment criteria and see a customized stock list.

This User’s Manual shows you how. Follow its numbered instructions using the examples shown or using stocks and investment criteria that interest you.

Getting Started

If you're using
the *Tradeline[®] Pocket Stock Guide*
for the first time,
read this section.

Install the Digital Book

You must install the Tradeline® Pocket Stock Guide before you can use it.

- 1. Turn the Digital Book System off.**
- 2. Insert the digital book in a slot on the back.**

Line up its tabs with the notches in the slot.
Then snap it in place.

- 3. Press **ON/OFF**.**

Protect Your Digital Books

Never install a digital book while the Digital Book System is on. If you do, you may erase information that you entered in the other installed digital book.

Select the Stock Guide

Once the Tradeline® Pocket Stock Guide is installed, here's how to start using it.

1. Press **CARD** .

2. Press  or  to highlight Stock Guide .

3. Press **ENTER** .

This is the entry line. In the *Stock Guide*, you can always return to it by pressing **CLEAR** .

Resuming Where You Left Off

If the Digital Book System is turned off while you're using the *Tradeline® Pocket Stock Guide*, simply press **ON/OFF** to return to the previous screen.

Adjust the Contrast

If the screen contrast is not to your liking, here's how to adjust it.

1. Turn the contrast wheel.

2. If the screen is still blank, check the batteries.

See “Replacing the Batteries” in Reference.

Help is Always at Hand

To see a help message at any time, press **HELP**. To move down the help message, press  or . To exit it, press **BACK**.

the Glossary
and information about using
the Digital Book System.

Glossary

Average Daily Price (AvePrc) • The average closing price of a stock within a 52 Week period.

Average Daily Volume (AveVol) • The average total daily volume traded within a 52 Week period.

Beta Factor (Beta) • A statistical coefficient providing a rough measure of a stock's price volatility compared to the market, represented by the S&P 500 Index. Beta is calculated from the most recent three years of stock pricing data. For example, a stock with a of 2.0 beta is twice as volatile as the market (i.e., it has gone up or down twice as much as the market). Conversely, a stock with a 0.5 beta bears half the risk of the S&P 500 Index.

Date of 52 Week High (DataHi) • The date of the 52 Week high price.

Date of 52 Week Low (DataLo) • The date of the 52 Week low price.

Dividend Payout Ratio (Payout) • The percentage of earnings per share returned to shareholders in the form of dividends per share. Payout is calculated by dividing the total

dividends paid by the latest reported 12-month earnings per share.

Earnings Per Share (EPS) • The latest reported portion of a company's profit allocated to each outstanding share of common stock within a 12-month period.

52 Week High Price (52WkHi) • The highest daily closing price of a stock within a 52 Week period.

52 Week Low Price (52WkLo) • The lowest daily closing price of a stock within a 52 Week period.

52 Week Return (Return) • The price performance during a 52 Week period added to the total dividends paid during that period and divided by the beginning price. Return is displayed as a percentage.

5 Year Percent Price Change (5Yr%) • The percent change between a stock's latest available price and its price five years ago.

Market Capitalization (MkCap) • A representation of a company's value, calculated by multiplying its latest reported shares outstanding by its latest available

closing price per share.

1 Year Percent Price Change (1Yr%) • The percent change between a stock's latest available price and its price one year ago.

P/E Ratio (P/E) • The latest available closing price of a stock divided by its latest available earnings per share. P/E indicates the growth in earnings expected by investors.

Total Dividend (TotDiv) • A representation of the total cash distributions paid to stockholders within a 12-month period.

Yield Ratio (Yield) • The dividend amount paid by a company represented as a percentage of the price. Yield is calculated by dividing the total dividend paid within a 12-month period by the latest available price.

Digital Book System

Installing & Removing Digital Books

To install a digital book, first turn off your Digital Book System. Then align the digital book's tabs with the notches in either book slot on the back and snap the book into the slot. If you install only one book, it doesn't matter which slot you use. But make sure that the book's metal contacts are facing down.

To remove a book, first turn off the Digital Book System. Then compress the book's tab and lift the book from the slot.

Restarting the Digital Book System

If the keyboard fails to respond or the screen performs erratically, first press **CLEAR** and then press **ON/OFF**. If nothing happens, hold **CLEAR** and press **ON/OFF**. If nothing happens still, press the recessed reset button on the back of your Digital Book System using a paper clip.

If you install or remove digital books when the Digital Book System is on, or when you reset the Digital Book System, you may delete information that you entered in the installed digital books.

Switching Between Digital Books

1. With two digital books installed, press

 .

2. Highlight a symbol by pressing  or  .
Then press  .

To return to the first book, repeat these steps.

Sending Words Between Books

Some digital books can send and receive words from other digital books.

1. Highlight a word in a digital book.

Read its User's Manual to learn how.

2. Hold  and press  .

3. Highlight the other digital book's symbol.
Then press  .

You see its main display. You may have to press  again to look up the word.

Replacing the Batteries

The Digital Book System uses CR2032 lithium batteries. Have new batteries ready before following these steps.

- 1. Turn the Digital Book System off.**
- 2. Press and slide the battery cover off the back of the unit. Then remove all the batteries.**
- 3. Place a battery, with its plus (+) sign up, at the bottom of each battery cavity.**
- 4. Place a battery, plus sign up, at the top of each cavity. The metal clip must contact the top battery.**
- 5. Replace the battery cover**

To avoid deleting information from installed digital books:

- Replace the batteries before they die out.
- Once the batteries have been removed, install new ones within two minutes.
- Don't mix old and new batteries.
- Never remove batteries with the unit on.

Protecting the Digital Book System

- Don't touch the metal contacts on the back of your digital books or the rubber contacts in the book slots of the Digital Book System. **CAUTION:** Touching the contacts with statically charged objects, including your fingers, could erase information that you entered in your installed digital books.
- Don't put excessive pressure or weight on your digital books or Digital Book System.
- Don't expose your digital books to extreme or prolonged heat, cold, or other adverse conditions.

When you're not using your Digital Book System, keep digital books or dummy books in its slots to prevent dust build-up.

Cleaning the Digital Book System

To clean the digital books, apply isopropyl alcohol with cotton swab.

To clean the Digital Book System, apply a mild household cleaner onto a soft cloth. **CAUTION:** Spraying liquids directly on your Digital Book System could damage its circuitry.
