Using the MORE key

When you enter a player's name, Big League Baseball Encyclopedia™ shows batting stats if the player batted for more seasons than he pitched. If he pitched for an equal number or more seasons than he batted, you see his pitching stats.

How do you see a pitcher's batting stats, if he has any? Try this example:

1. At the Request Line, type **steve carlton**.
2. Press **ENTER** and then use the arrows to see his pitching stats.
3. Press **MORE** to see his batting stats.
4. To return to his pitching stats, press **MORE** again.

To see a batter's pitching stats, follow the same steps. Try **babe ruth** as an example.

Requests with Ratios

A ratio is one stat divided by another. You can type a ratio after MAX or MIN in your requests.

However, you can't

- divide a batting stat by a pitching stat or vice versa (e.g., AB/IP), or
- use stats in ratios that are already ratios (i.e., BA, ERA, SLG).

In this example, we'll find the players with the most home runs per at-bat.

Type the Request

1. At the Request Line, type **max hr/ab**. Then press **ENTER**.

Press **SPEC** to type a backslash (/).

2. Press **↓** or **↵** to see more stats.

About Infinite Ratios

The value of a ratio is infinite when its denominator is zero. For example, if you enter MAX W/L, you'll see this:

	Player	W/L
1	Shields, Ben	inf
2	Richardson, Hardy	inf
3	Merritt, George	inf
4	Nelson, Luke	inf

INF means that Ben Shields never lost a game.

When you type requests with ratios, you'll often want to limit the denominator to see players with significant at-bats, innings pitched, etc. See "Adding a Limiter" to learn how.

Advanced Requests

This section shows how to add limiters and qualifiers to your requests.

Adding a Limiter

To limit the statistical range of your player requests, type a limiter after MAX or MIN and the stat or ratio. Limiters always have this structure:

a stat or ratio + GT or LT + a number

GT means greater than, LT less than.

In this example, we'll find the players with the most home runs who have a career batting average less than .250.

Type a Request

1. Type `max hr ba lt .250`. Then press

ENTER .

Type your request...

`max hr ba lt .250`

...then press **ENTER**

2. Press the indicated arrow keys to see more.

	Player	HR	↑ ↓
1	Kinman, Dave	432	↓
2	Evans, Darrell	414	
3	Nettles, Graig	390	
4	Thomas, Gorman	268	

3. When you're done, press **CLEAR**.

Or Use the Menu

1. Press **MENU**.
2. Under Requests, select Maximum.
Then press **ENTER**.
3. Press **MENU**.
4. Under Stats, select Batting Statistics.
Then press **ENTER**.
5. Select Home Runs. Then press **ENTER**.
6. Press **MENU**.

7. Under Focus, select Add a Limiter.
Then press **ENTER**.

8. Select Batting Average. Then press **ENTER**.
9. Press **MENU**.

```
Focus Qualifiers Other
Greater Than (GT)
Less Than (LT)
...then press ENTER
```

10. Under Focus, select Less Than.
Then press .
11. Type .250. Then press .
12. Press to see the results.

Understanding Limiters

- Each limiter must begin with its own stat abbreviation or ratio, *even when that stat or ratio is the same as the one following MAX or MIN*. For example, to see the players with the most home runs, who have at least 500 home runs, you would enter “MAX HR HR GT 499.” Notice the second HR.
- When you’re limiting a ratio, you’ll usually want to limit the denominator. For example, to see the players with the best home-run-to-at-bats ratio who have at least 1000 career at-bats, enter “MAX HR/AB AB GT 1000.”

Limiting Biographical Stats

Type weights in pounds, heights in inches (e.g., 74 for players who are 6' 2"), and ages in years.

Ages are based on birthdays before or after July 1. So, a player who was 24 at season's start, and was born on June 30, is considered a 24 year old for the entire season.

Including Pitchers

Pitchers with no at-bats aren't included in biographical requests. To include them, add a P to your request (e.g., MAX WT P). You must also add a P to specify hits (H), strikeouts (SO) and bases on balls (BB) allowed by a pitcher (e.g., MAX H P).

Limiting By Team

To narrow your lists to a single team, add a team limiter to your requests. Team limiters can be a team's name, city, or city abbreviation.

You can type only one team limiter in a request. If you type a team that has had more than one home city, or a city with more than one team, you'll see a list of team choices.

In this example, we'll find the Yankee all-time RBI leader.

Type a Request

1. At the Request Line, type **max rbi yankees**. Then press **ENTER**.

2. Use the indicated arrows to see more stats.

a single year	1969

After H (hits), SO (strike outs) and BB (bases on balls), P specifies the number of each stat given up by a pitcher.
- **SS** narrows requests to single season totals.
- **QUAL** narrows requests to players with enough at-bats or innings pitched to qualify for the annual league leader titles in the various statistical categories. You may want to combine QUAL with SS in your requests.

Digital Book System

This section contains information needed to use and maintain your Digital Book System.

Digital Book System

Installing & Removing Digital Books

To install a digital book, **first turn off your Digital Book System**. Then align the digital book's tabs with the notches in either book slot on the back and snap the book into the slot. If you install only one book, it doesn't matter which slot you use. But make sure that the book's metal contacts are facing down.

To remove a book, **first turn off the Digital Book System**. Then compress the book's tab and lift the book from the slot.

Restarting the Digital Book System

If the keyboard fails to respond or the screen performs erratically, first press **CLEAR** and then press **ON/OFF**. If nothing happens, hold **CLEAR** and press **ON/OFF**. If nothing happens still, press the recessed reset button on the back of your Digital Book System using a paper clip.

If you install or remove digital books when the Digital Book System is on, or when you reset the Digital Book System, you may erase information that you entered in the installed digital books.

Switching Between Digital Books

1. With two digital books installed, press

 .

Read its User's Manual to learn how.

2. Hold  and press  .

3. Highlight the other digital book's symbol.
Then press  .

You see its main display. You may have to press  again to look up the word.

Replacing the Batteries

Your unit uses CR2032 lithium batteries. Before replacing them, have four new batteries ready.

- 1. Turn your Digital Book System off.**
- 2. Remove the battery cover on the back.
Then remove all batteries.**
- 3. Promptly slide two new batteries into the battery cavity with the metal clip over it.**

Don't bend the clip; it's an electrical contact. And make sure the batteries' plus (+) signs face up.

- 4. Slide two new batteries into the other cavity. Then replace the battery cover.**

To prevent deleting information from installed digital books:

- Always replace the batteries before they lose all power, and never remove the batteries while the Digital Book System is on.
- Never mix old and new batteries. And, once batteries have been removed, install new ones within two minutes.

Protecting the Digital Book System

- Don't touch the metal contacts on the back of your digital books or the rubber contacts in the book slots of the Digital Book System. **CAUTION:** Touching the contacts with statically charged objects, including your fingers, could erase information that you entered in your installed digital books.
- Don't put excessive pressure or weight on your digital books or Digital Book System.
- Don't expose your digital books to extreme or prolonged heat, cold, or other adverse conditions.

When you're not using your Digital Book System, keep two digital books or dummy books in its slots to prevent dust build-up.

Cleaning the Digital Book System

To clean the digital books, apply isopropyl alcohol with cotton swab.

To clean the Digital Book System, apply a mild household cleaner onto a soft cloth. **CAUTION:** Spraying liquids directly on your Digital Book System could damage its circuitry.
