The BOOKMAN® Concept

This expandable electronic book system features the unique Franklin BOOKMAN® ROM card concept. Each BOOKMAN® product contains this unique slot in the back that lets you expand the product's use.

When you snap in a ROM card, you have access to an entirely different title. With over 30 ROM card titles available, you can build an electronic library that is truly portable.

The BOOKMAN® ROM Card

The BOOKMAN® ROM card is designed to interact with the BOOKMAN® platform.

The red, green, yellow and blue function keys on the keyboard correspond with each of the coloured symbols printed on the ROM card.

The card's built-in tutorial tells you how each of the coloured symbols incorporates a different function using the platform's matching colour key. Just a few of the many ROM card titles available include:
